Acculus™

Assessment & Active Inventory Management

SHARPEN YOUR IT EXPENSES

WHAT DOES ASSESSMENT & ACTIVE INVENTORY MANAGEMENT (AIM) ENTAIL?

WIP

WHAT IS ACCULUS'S TRACK RECORD WITH IM?

WIP

WHAT DOES THE PROCESS LOOK LIKE?

Acculus first conducts an Accupoint Assessment, establishing visibility by inputting all current and historical data into AIM, a proprietary software created by Acculus. Acculus then looks for cost-saving opportunities, all the while creating an active inventory and relaying findings with execution guidance. Acculus then provides ongoing support through inventory management and daily reporting.

HOW LONG DOES IT TAKE?

Acculus completes an Accupoint Assessment, which takes 7-10 weeks. This is where all current and historical data is organized and analyzed, with stakeholders being presented with findings at the end of the 7 - 10 weeks. With the foundation set, Acculus provides ongoing support for a determined time period based on your company's needs.

WHY IS IT IMPORTANT?

WIP How do you make sure assets match the need so you aren't overpaying for things you don't use? If you think your organization may need to get better at provisioning, consider a call to discuss the merits of getting some help.
